

John Wright Modelmaking

The price list shows pictures of joints at actual size. The size reference (3mm-12mm) is the actual ball size. The balls come pre-drilled & are made from a hardened stainless steel. The joint plates are machined from mild steel stock. Joints do not come pre soldered. A ball & socket unit comprises of 2 machined steel plates, a tension screw, pre drilled stainless balls, & a length of stainless steel rod. We recommend only hard (silver) solder to be used in joining stainless steel.

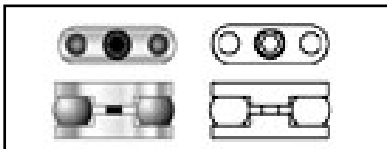

All joints are usually in stock & are dispatched on receipt of payment. A 10% discount is offered to students. Please add £6 for post & packaging and 17.5% VAT to the total. (UK)
For Quotes & more information Please contact our studio.

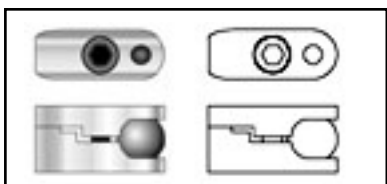

3mm double £13.50 extra balls £2 each

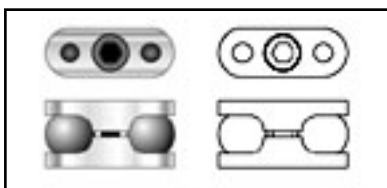

5mm single £11.50 extra balls £2.40 each

5mm double £13.90 extra balls £2.40 each

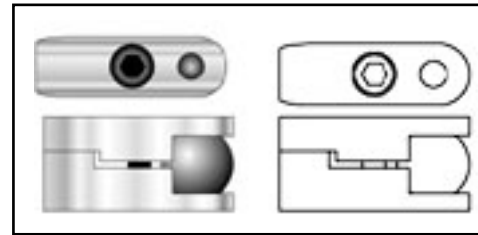

6mm single £14.00 extra balls £2.65 each

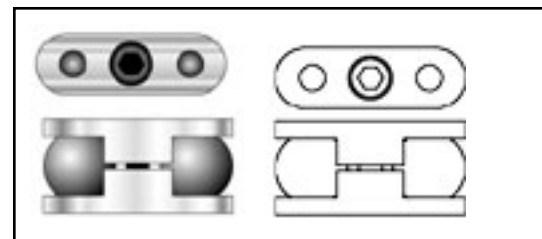

6mm double £16.65 extra balls £2.65 each

We also offer a full armature design & construction service & have produced armatures for studios around the world. including :-
Olive Jar Studios - USA.
Mola Studios - Portugal.
Aardman Animations - UK.
Woodland Studios - Australia
National Film Board Of Canada

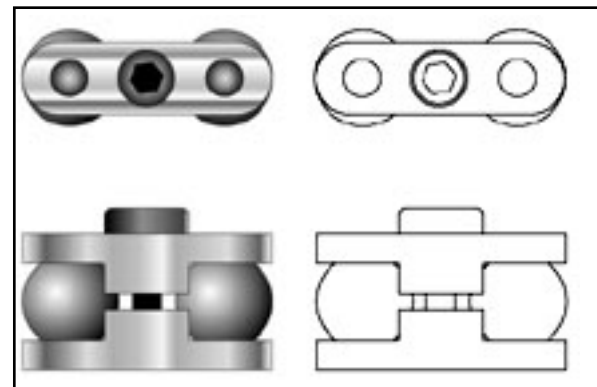

By faxing or posting a simple out line drawing of your character, we can scan the image into a computer & design the construction of the armature, this can then be faxed back for your approval. This design process can be completed within 1 hour. After approval, the construction of an armature can be completed within 1 week depending on work loads. Prices start at around £550.

9mm single £17.00 extra balls £3.40 each

9mm double £20.40 extra balls £3.40 each

12mm double £25.40 extra balls £3.90 each
